Deploying Secure Engineering Applications Online

Tutorial 7 (week 10)

Distributed Denial of Service Attacks

Questions

- 1) What is the difference between a direct attack and a reflector (or indirect) attack?
- 2) A) What is the following attack? Which host is attacking and which is being attacked?

- 2) B) Is this a direct or reflector attack?
- 3) Draw a diagram showing how a TCP sequence number attack can be mounted as a reflector attack.
